

Cardinal, P. "Real-Time Correction of Closed-Caption" In *Proceedings of the 45th Annual Meeting of the Association for Computational Linguistics (ACL 2007) - Demo and Poster Sessions*, pp. 113-116. Prague, Czech Republic, June 23-30, 2007.

Abstract

Live closed-captions for deaf and hard of hearing audiences are currently produced by stenographers, or by voice writers using speech recognition. Both techniques can produce captions with errors. We are currently developing a correction module that allows a user to intercept the real-time caption stream and correct it before it is broadcast. We report results of preliminary experiments on correction rate and actual user performance using a prototype correction module connected to the output of a speech recognition captioning system.
